DEADLINE

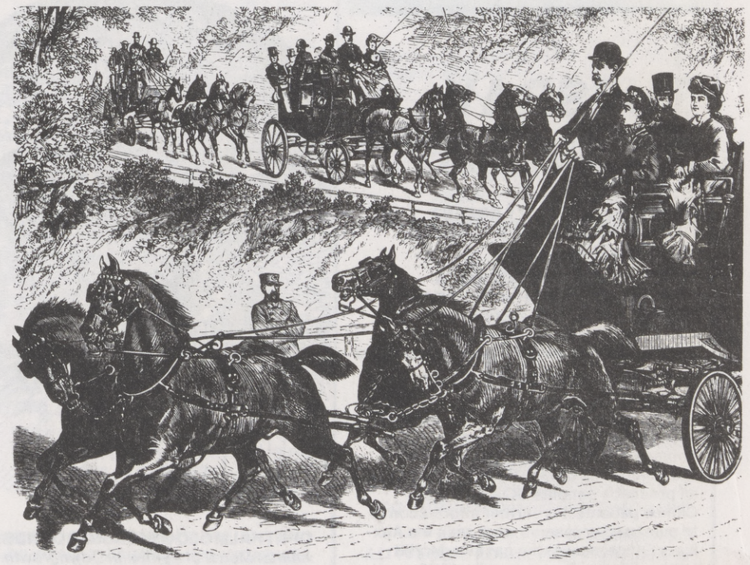
Deadline for the next issue of *Today & Tomorrow*, which will cover the time period February 12 to 25, will be **Tuesday, February 1, 11 a.m.** Please send your copy to Allen Balderson, News & Public Information Services, 532 Parnassus Ave., Rm. 300, x1541 or x2557.

Now that the last patients have been moved out of old UC Hospital, the building will be used for swing space during the transition period during which the Long Range Development Plan will be implemented for the '80s.

First stage will be the conversion of the third and fourth floors of the old hospital to be used as interim laboratory facilities for molecular genetics and immunology research. Demolition is now underway in this area and will last through the middle of March. At that time remodeling will begin and last through March of 1984.

Barricades have been constructed in the main corridors on the western side of the third and fourth floors. Construction workers are using the southern end of the building to move materials and debris. The outside walkway on the fourth floor level behind old UC Hospital is blocked. Anyone walking to the School of Dentistry building or to one of the back courtyards will have to use alternate routes. Temporary stairs will be constructed on the hillside.

For further information contact Gene Perry at x5343.



UCSF patients and their families who drive to campus are experiencing significant difficulties in finding parking spaces. This is partly a result of the new parking restrictions in the southeast section of Golden Gate Park, which were initiated the beginning of January without prior notification of the campus.

To help meet the need for patient parking, the following changes have been made on a crisis basis beginning Monday, January 24. Meanwhile comprehensive planning is underway for our total campus parking needs.

- the entire "E" level of the Millberry Union west section of the garage has been converted from decal permit to public use;
- some additional spaces are available to decal holders on the "F" level, and the fee lots off Kirkham are available to "A" and "C" decal holders.

If these actions prove insufficient to meet patient requirements, additional changes will have to be made, including extension of valet parking as needed in the decal permit areas.

Because the care of patients is a critical aspect of the campus, UCSF staff members are urged to refrain from using the public section of the garage, so that UCSF patients may come to our facilities with as little inconvenience as possible.

UCSF offers several alternatives to driving alone to campus, including vanpools, carpools and Marin commuter buses. For further information on these successful programs call x1511. In addition, the MUNI system has improved its direct connections to the campus on several lines.

Individuals who must drive to campus will find a significant increase in fees for non-patients who park more than six hours in the public areas of the garage, and may want to try alternate public parking spaces such as the campus fee lots on Kirkham near Fifth Avenue and behind the School of Dentistry, or the privately owned garage at 350 Parnassus Avenue.

In addition, a limited number of public parking spaces are offered by the City in the Kezar Stadium lot (entrance on Stanyan Street near Frederick) at $1.50 per day or $60 per quarter. Permits are available by calling the Recreation and Parks Department office at 558-3574.

NEWS BRIEFS

Senate Majority Leader John Garamendi will present a special lecture entitled "The Future of California's Health Care" on Friday, February 11 at 4 p.m. in Cole Hall.

Garamendi, former chair of the Senate Health and Welfare Committee, is the legislature's leading advocate for reform of the MediCal program. His lecture, sponsored by the Alumni Association of UCSF, will discuss some of the economic and political forces shaping the future of health care in this state.

The School of Medicine Alumni-Faculty Association is offering a series of free lectures, which started in January, for medical students and house staff. The series is entitled "Practice Forum: Options After Training" and is being given in cooperation with the departments of Pediatrics, Medicine, Family and Community Medicine and Surgery.

Each lecture features a physician or researcher who is a UCSF alumnus, who answers questions that medical students and house staff most frequently raise about life after residency. Alumni offer a wider knowledge base on which students may make their choices of housestaff training, private practice or opportunities available in academic medicine.

Each department will present a lecture in February, including Pediatrics on Wednesday, February 9, in Room M 666 from 12:15 to 1 p.m. For further information on this new series call x1471.

The Physics Research Laboratory in the Department of Radiology was formally dedicated in early January.

Located in South San Francisco, the laboratory houses a cinetomographic scanner—a CAT scanner that scans in milliseconds (35 pictures per second) enabling physicians to better study the various organs of the body, especially the heart. This sophisticated scanner has no moving parts, unlike conventional CT imaging, except for electrons which scan the target, similar to the way a TV tube functions.

Director of the laboratory is Douglas P. Boyd, PhD.

Deadline for submission of nominations for the Chancellor's Award for Public Service is Friday, February 25, in the Chancellor's Office, Room S 126. UCSF faculty, students and staff who have performed outstanding service to the campus and/or to the community are eligible for nomination. If you have not received a nomination form through the campus mail call x2401.

Several UC Extension leaders have contributed essays to a special issue of *MOBIUS*, dedicated to Philip E. Frandson, the late dean of University Extension at UCLA.

These essays include "Continuing Education in the Academy," by Dean Leonard Freedman of UCLA, "The University and Public Responsibility," by former Dean Carl Tjerandsen of UC-Santa Cruz, and "Pluperfect Programming," by Dean Milton Stern of UC-Berkeley. Other contributing authors include Cyril Houle of the W. K. Kellogg Foundation, Morton Gordon of the University of Michigan, Kathleen Rockhill of the University of Toronto and Richard Caplan of the University of Iowa, all prominent scholars in the field of continuing education.

In addition, Gert H. Brieger, MD, PhD, UCSF chair of History of the Health Sciences, begins a regular *MOBIUS* column in this issue.

Published by UC Press, *MOBIUS* is available by subscription (individuals $20/year; institutions $30) or single issue purchase ($5). For further information call x3904 or write Lucy Ann Geiselman, PhD, *MOBIUS* Editor, 1326 Third Avenue.

A one-day seminar for nurses and individuals responsible for health and safety in the workplace will be held on Wednesday, February 9, at UC Extension, 55 Laguna Street.

Sponsored by the UCSF Occupational Health Clinic at SFGH, the Northern California Occupational Health Center and the American Lung Association of San Francisco, the program will examine the overall magnitude of the occupational lung disease problem including prevention, identification and follow-up of occupational asthma and asbestos-related diseases.

Registration deadline is February 1. Continuing Education credit is available. For further information contact the Northern California Occupational Health Center in Berkeley, 642-5507.

Thirteen UCSF faculty members and several guest faculty will explore the multiple facets of emotion from a practitioner's perspective at a symposium on Saturday and Sunday, February 26 and 27 at the Holiday Inn Golden Gateway.

Second in the "Mind and Medicine" series, "Emotions in Health and Illness: Applications to Clinical Practice," is designed for physicians and mental health practitioners, as well as clinical or behavioral science investigators to enhance their understanding of how current research findings and conceptualizations in the area of emotion can be applied to their clinical practices.

Topics will include senile dementia treatments, insomnia, biofeedback for stress-related disorders, self-help groups and stress response syndromes.

The symposium is sponsored by Continuing Education in Mental Health and Behavioral Sciences, Department of Psychiatry and the Academic Press. Continuing education credit is available. For further information call x77-256 or x77-554.

Because of the increased use of Video Display Terminals (VDTs) on campus, the Office of Environmental Health and Safety has reviewed the "Good Practice" use of VDTs. Studies in 1977 and 1981 by the National Institute for Occupational Safety and Health (NIOSH) found that there is no radiation hazard from current VDT models. The amount of radiation was less than that of a home TV set.

Environmental Health and Safety makes the following recommendations, however, concerning individual operator comfort:

- work stations and equipment should be made flexible with the operator controlling keyboard height, screen height/brightness and contrast, leg room, viewing distance, work station illumination and chair adjustments;
- to reduce eye strain, fulltime VDT operators should periodically go from near to far vision by taking 15-minute rest breaks every two hours;
- fulltime VDT operators should have 20-20 correctable vision.

Consultation on the proper placement, positioning and lighting for VDT terminals is available from the Office of Environmental Health and Safety at x2684, x2609 or x1300.

A course entitled "Nursing in the Competitive Health Care System: Changing Economics" will be sponsored by the Department of Mental Health and Community Nursing in the School of Nursing, on Saturday March 26 in HSW 300.

The course will address the impact of federal and state economic policies on nurses and the practice of nursing—including the recent MediCal legislation. Enrollment is limited; continuing education credit is available. For further information contact Jean Bullard at x1504.

Nominations are now being solicited for the 15th annual Kaiser Awards for Excellence in Teaching, open to any member of the faculty of the School of Medicine who is active in teaching undergraduate medical students and/or housestaff.

These awards were established by the Henry J. Kaiser Family Foundation. This year, three awards of $750 each are to be presented.

Nominations may be submitted by students, housestaff, or faculty and should include a brief description of the nominee's teaching responsibilities, effectiveness of presentation and ability to stimulate interest and self-education. The submission of supporting letters from the nominee's students and peers and other appropriate documentation is encouraged.

Nominations should be sent to: Chair, Committee on the Kaiser Awards, Dean's Office Rm. S 224, before Monday, February 28.

The Robert Wood Johnson Foundation has recently funded 21 research projects totaling $3 million, aimed at "improving medicine's capacity to assist impaired, acutely, or chronically ill individuals in regaining or maintaining their functional abilities."

Two of these grants have been awarded to three UCSF faculty—Donald D. Trunkey, MD, Burnet B. Sumner, MS, and Robert H. Pantell, MD. Each project will receive up to $150,000 under the Foundation's Medical Practice Research and Development Program.

Trunkey, professor of Surgery, director of the Burn Center and chief of Surgical Services at SFGH, and Sumner, assistant clinical professor of Psychiatry at SFGH, have been funded for their project "Evaluation of Psychosocial Intervention for Trauma Patients," and Pantell, associate professor of Pediatrics, for "Improving Function in Chronically Ill Children: Evaluation of an Active Communication Model."

The Fifteenth edition of the "Serials Title List," issued by the UCSF Health Sciences Library, is now available for ordering. Publication is scheduled for February, 1983, to allow time for all possible start-of-the-year entry revisions.

The list includes more than 8,900 unique current and ceased periodical, newspaper and serial titles, as well as over 1,600 references and 7,200 bibliographic history notes. The library's collection provides in-depth coverage of medical, nursing, dental and pharmaceutical literature, supplemented by coverage in the basic and social sciences.

The catalog will be a paper-bound 8½" x 11" volume, priced at $15. All orders must be prepaid with checks made payable to the UC Regents. Orders may be sent to: Serials Title List, The Library, Room S 257. For further information contact Verna Astaff at x2334.

IN MEMORIAM

Edmund William Overstreet, founder of the California Physicians for Therapeutic Abortion. A member of the UCSF faculty since 1946, he retired as professor and chair of the Department of Obstetrics and Gynecology in 1971. He was the inventor of the Overstreet forceps, used commonly in difficult child deliveries and was known for his work in infertility, menopause and the development of surgical techniques and instrumentation. Overstreet was an outspoken advocate of women's rights to control their fertility and a major figure in Planned Parenthood. He with other physicians of the Therapeutic Abortion group lobbied in Sacramento to achieve the abortion reform bill of 1967.

Marjorie Huxley, A '24 graduate of the UCSF School of Nursing, and an active member of the school's Alumni Association, she was assistant superintendent of nurses from 1934—when the Clinical Sciences building first opened—to her retirement in 1955.
